FOR WINDOWS

FlowKeys

Mechanical keyboard sounds for your PC. No keyboard needed.

$80 – $300+
Mechanical keyboard

vs.

Free
FlowKeys

TWO SOUNDS INCLUDED

Mechanical
Classic Cherry MX click. The satisfying sound from every coding video.

Soft
Quieter, gentler tap. Perfect for late nights or shared spaces.

SETUP GUIDE

Download. Double-click. Done.

1. Go to **github.com/rhalder90/FlowKeys/releases** and download **FlowKeys.exe**.
2. Double-click **FlowKeys.exe**. Windows may show a blue warning — click **More info** → **Run anyway**. This is normal for unsigned apps.
3. **No permissions needed.** Unlike macOS, Windows lets FlowKeys hear your keystrokes without any extra setup. Just start typing.
4. ✓ **Done.** Start typing. You'll hear a mechanical click on every keypress.

> **SmartScreen warning:** Windows shows "Windows protected your PC" for apps downloaded from the internet that aren't signed. FlowKeys is free, open source, and safe. Click **More info** → **Run anyway** to proceed.

> **Auto-start on login:** To have FlowKeys start automatically when you turn on your PC, run: `FlowKeys.exe --enable-autostart`

KEYBOARD SHORTCUTS

`Win + Ctrl + K`	`Win + Ctrl + S`
Turn sound on / off	Switch mechanical / soft

TROUBLESHOOTING

No sound? Make sure your volume is not muted. Some antivirus may block keyboard hooks — add FlowKeys as an exception.

Remove auto-start: `FlowKeys.exe --disable-autostart`

Uninstall: Just delete FlowKeys.exe. If you enabled auto-start, run `--disable-autostart` first.
